

Specialist Extension Level Training: Wood Turning Lathe (S7HS)

This programme:

Covers the safe operation and maintenance of a Wood Turning Lathe as well as learning some of the processes and methods of manufacture the machine is capable of.

Outcomes:

Upon successful completion of the course and payment of the Design and Technology Association's registration fee of £25 you will be issued with a certificate from DATA.

Your Commitment:

The delegate will need to attend the training day for the full day.

Our Commitment:

To provide high quality training and to ensure that all of the criteria for successful assessment in line with the certification from DATA is met. All of the machines will meet BS4163: 2007 and will provide the delegate with all course materials.

Eligibility:

It is recommended by DATA that all members of staff (including site staff) who use a wood turning lathe should complete this course.

Testimonial:

“ I have seen hollow shapes manufactured on a wood turning lathe before so I knew that it was possible but I just didn't know how to do it. Now that I do know, I can supervise our students when they are making some of their projects and now are able to manufacture a wider variety of products than they could before.

”
